

## We grow extraordinary apples for extraordinary retail partners

Here at Pepin Heights Orchards, we are motivated by one simple premise: apples should be exciting. We know that consumers who buy our fruit expect more than mere calories. They expect to revel in the flavor, and delight in the eating experience. We take that responsibility seriously. In fact, our goal is that after eating a Pepin Heights apple, you'll want another one – right away.

We grow extraordinary apples. We ship them only for a short time, while they are at their peak. We sell them through top retailers who share our passion for great food.

### Why choose Pepin Heights?

- **We start with the right varieties:** We travel the globe to find the best tasting apples (and we find many of them right here in Minnesota!).
- **We grow them in the right place:** Our orchards on the bluffs about the Mississippi River are ideal apple-growing *terroir*.
- **We wrote the first chapters of the HoneyCrisp story:** We were the first apple producer to see this variety's potential; it has since become a national apple phenomenon.
- **And now we are doing it again, with SweetTango.**
- **We supply the apples your customers will ask for by name.**
- *You share our passion for great food.*
